EDUCATION

McGill University, Montréal, QC

Expected May 2027

Master of Science in Epidemiology

- Thesis: Neighborhood heat exposure and emergency department utilization among older adults

University of Ottawa, Ottawa, ON

June 2024

Honours Bachelor of Health Sciences

- Graduated magna cum laude

RESEARCH EXPERIENCE

Graduate Research Assistant, Urban Health Metrics Lab

Sept 2025-Present

McGill University

- Clean and link weather station, census, and emergency department datasets covering 11 Montréal boroughs.
- Draft reproducible R scripts for sensitivity analyses involving lagged temperature exposure windows.
- Prepare weekly data notes for a cross-disciplinary team of epidemiologists, clinicians, and municipal analysts.

Summer Research Student, Ottawa Hospital Research Institute

May-Aug 2024

Ottawa, ON

- Abstracted clinical variables from 210 anonymized charts for a study of post-discharge follow-up after sepsis.
- Flagged inconsistent coding patterns that informed a revised chart review guide for incoming assistants.

PUBLICATIONS

Moreau E., Singh P., Caron L. Heat-alert messaging and care-seeking behavior among older adults. *Canadian Journal of Public Health*. In review.

Caron L., Moreau E., Tran V. Built environment predictors of summer respiratory visits. *Environmental Health Abstracts*. 2025;12(3).

SELECTED PRESENTATIONS

Moreau E. Neighborhood heat exposure and emergency department utilization. Poster presented at Canadian Public Health Association Annual Conference; 2026 May; Winnipeg, MB.

Moreau E., Tran V. Chart review reliability in sepsis follow-up studies. Lightning talk presented at Ottawa Hospital Trainee Research Day; 2024 Aug; Ottawa, ON.

SKILLS

R, tidyverse, REDCap, Zotero, SAS basic, French and English fluent

METHODS TRAINING

Graduate Methods Sequence

2025-2026

McGill University

- Completed coursework in causal inference, survival analysis, longitudinal data methods, and reproducible research workflows.
- Built R Markdown templates for analysis notes so collaborators could review assumptions, exclusions, and model changes.

PROFESSIONAL SERVICE

Student Reviewer, Population Health Journal Club

Sept 2025-Present

Montréal, QC

- Summarize methods limitations and data-source constraints for monthly article discussions.
- Coordinate speaker questions for visiting researchers presenting climate and health work.
