

Maya R. Chen

maya.chen@example.com | (315) 555-0184 | Ithaca, NY | github.com/mayarchen

OBJECTIVE

Recent computer science graduate seeking an entry-level software engineering role focused on internal tools, data workflows, and user-centered automation.

EDUCATION

Cornell University, College of Engineering, Ithaca, NY

May 2026

Bachelor of Science in Computer Science, Minor in Information Science

- GPA: 3.41; Dean's List, Spring 2025
- Relevant Courses: Data Structures, Databases, Web Programming, Human-Computer Interaction

PROJECTS

Course Planner Web App

Jan-May 2026

Class project

- Built a React and Flask prototype that let 28 classmates compare course combinations against graduation requirements.
- Created SQLite seed data and validation checks for duplicate courses, missing prerequisites, and semester credit limits.

Campus Food Pantry Inventory Sheet

Sep-Dec 2025

Volunteer technical project

- Replaced a shared spreadsheet with a lightweight Google Apps Script workflow that flagged low-stock items each Friday.
- Documented the handoff process for three student volunteers with limited technical background.

EXPERIENCE

Library Technology Assistant, Cornell University Library

Aug 2024-May 2026

Ithaca, NY

- Resolved 10-15 weekly student support tickets involving printing, classroom displays, and account access.
- Created a short troubleshooting checklist that reduced repeat escalation for common scanner setup issues.

SKILLS

Python, Java, JavaScript, React, Flask, SQL, Git, Excel; basic Spanish

ADDITIONAL PROJECTS

Student Organization Check-In Tracker

Feb-Apr 2026

Python and Airtable

- Created a small script that compared event sign-in exports against member rosters and highlighted duplicate or missing check-ins.
- Shared weekly attendance summaries with two club officers so they could follow up with inactive members before elections.

Intro Programming Review Notes

Fall 2025

Peer learning resource

- Compiled short examples for recursion, dictionaries, and file input/output after tutoring first-year students during office hours.
- Organized examples into a GitHub repository with README files and expected output for each exercise.

LEADERSHIP & SERVICE

Peer Tutor, Engineering Learning Initiatives

Sep 2025-May 2026

Ithaca, NY

- Tutored 6-8 students weekly in introductory Python and data structures, focusing on debugging habits and test-case design.
- Coordinated review sessions before two prelims and collected anonymized questions to improve future study guides.
