PROFILE

Operations analyst transitioning into data analytics, with experience improving hospital workflows and building SQL/Python projects around staffing, scheduling, and quality metrics.

TECHNICAL PROJECTS

Clinic No-Show Dashboard

Mar-May 2026

Independent project

- Modeled 18 months of de-identified appointment data in PostgreSQL and created cohort views by clinic, referral source, and appointment type.
- Built a Streamlit dashboard that highlighted weekday and reminder-message patterns associated with missed appointments.

Supply Cart Restock Forecast

Nov 2025-Jan 2026

Python analysis

- Cleaned CSV exports from three supply rooms and used pandas to identify items with recurring stockouts before Monday clinics.
- Presented a reorder threshold model that would have avoided 63% of urgent restock requests in the sample period.

EXPERIENCE

Patient Access Coordinator, Lakeside Medical Group

Jun 2022-Present

Chicago, IL

- Coordinate scheduling and insurance intake for a 12-provider specialty practice averaging 340 visits per week.
- Created Excel quality checks for referral queues, reducing unworked referrals older than seven days by 46%.
- Partner with nurse managers and IT support to document root causes for appointment delays and duplicate patient records.

Administrative Assistant, West Loop Physical Therapy

Aug 2020-May 2022

Chicago, IL

- Maintained daily visit logs, payment records, and therapist schedules across two clinic locations.
- Trained four new front-desk staff members on intake scripts and claims documentation standards.

EDUCATION

DePaul University

Certificate expected Dec 2026

Data Analytics Certificate

- Coursework: SQL for Analytics, Python Programming, Data Visualization

University of Illinois Chicago

May 2020

Bachelor of Science in Public Health

SKILLS

SQL, Python, pandas, Tableau, Excel pivot tables, healthcare operations, Spanish conversational

ADDITIONAL ANALYTICS WORK

Referral Queue Aging Review

Feb 2026

Workplace analysis

- Exported referral queue snapshots and grouped delayed records by payer, clinic, and missing-document reason.
- Recommended a daily triage view that helped supervisors separate true bottlenecks from duplicate or already-scheduled referrals.

COMMUNITY & TRAINING

Volunteer Data Coach, South Side Tech Circle

Sep 2025-Present

Chicago, IL

- Help adult learners practice spreadsheet cleanup, filtering, and chart interpretation using public health sample datasets.
- Prepared short exercises on pivot tables and basic SQL-style grouping for learners exploring analyst careers.
