

Jordan Kim

jordan.kim@example.test | github.com/jordankim-labs | portfolio: jordankim.dev | Ithaca, NY

EDUCATION

Cornell University, College of Engineering, Ithaca, NY

Expected May 2027

Bachelor of Science in Electrical and Computer Engineering

- Relevant Courses: Machine Learning, Embedded Systems, Computer Vision, Algorithms

PROJECTS

Bike Lane Hazard Detector

github.com/jordankim-labs/bike-lan
e

Computer vision project

- Trained a YOLOv8 model on 1,800 labeled street images to identify potholes, blocked bike lanes, and construction cones.
- Built a small Flask API and map view that grouped hazards by route segment for a student cycling club pilot.

Meal Match

demo.jordankim.dev/meal-match

Full-stack web app

- Developed a Next.js and Firebase app that matched students by dining hall preferences and overlapping free time.
- Added privacy controls for preferred first name, contact method, and blocked time slots after testing with 16 users.

Microcontroller Greenhouse Monitor

Fall 2025

Embedded systems lab

- Programmed an ESP32 to collect humidity, soil moisture, and light readings every 10 minutes.
- Displayed sensor summaries in a simple web interface and logged threshold alerts for later calibration.

TECHNICAL SKILLS

Python, C++, TypeScript, Next.js, Firebase, Flask, OpenCV, PyTorch, Arduino, Git

EXPERIENCE

Student App Developer, Cornell AppDev

Sep 2025-Present

Ithaca, NY

- Contribute bug fixes and UI polish to a campus events app used by student organizations.
- Review pull requests for accessibility labels, state handling, and mobile layout regressions.

ACTIVITIES

Association of Computer Science Undergraduates; Cornell Cycling Club

LEADERSHIP EXPERIENCE

Hardware Lead, Greenhouse Automation Team

Jan 2026-Present

Cornell Design Collaborative

- Coordinate a five-student subgroup building sensor mounts, wiring diagrams, and calibration logs for a campus greenhouse pilot.
- Track hardware issues in GitHub Projects so firmware, enclosure, and data-dashboard work remain aligned before weekly demos.

COURSEWORK & AWARDS

Coursework: Signals and Systems, Data Structures, Probability Models, Digital Logic, Product Studio

Awards: Cornell Engineering Project Showcase finalist, 2026; Dean's List, Fall 2025
