

Alex Chen

+1 000 000 0000 alex.chen@email.com La Jolla, CA

Objective

Software Developer with experience building backend services, APIs, and data-driven applications. Strong background in system design, database integration, and production-ready software development.

Experience

SOFTWARE DEVELOPER; NIMBUS SYSTEMS; SAN FRANCISCO, CA; JUL 2022 - PRESENT

- Designed and implemented backend services supporting internal applications
- Built and maintained REST APIs with authentication and data validation
- Integrated relational databases and optimized queries for performance
- Collaborated with cross-functional teams to deliver production features

JUNIOR SOFTWARE ENGINEER; BLUEWAVE TECHNOLOGIES; SAN JOSE, CA; AUG 2020 - JUN 2022

- Developed application features in Python and JavaScript
- Assisted with debugging, testing, and refactoring existing codebases
- Wrote technical documentation and supported deployment workflows

Education

Institute of Computing and Data Science, San Jose, CA
B.S. Computer Science; 2016 - 2020

Projects

Data Ingestion Platform

- Built a backend service to process and validate structured and semi-structured inputs
- Implemented logging and error handling for production monitoring

Task Management Web Application

- Developed API endpoints and database models
- Implemented user authentication and role-based access control

Skills

Programming Languages: Python, Java, JavaScript, TypeScript, SQL

Backend & APIs: RESTful API design, FastAPI, Flask, Node.js, authentication workflows

Databases: PostgreSQL, MySQL, SQLite, database schema design, query optimization

Cloud & DevOps: Docker, containerized deployments, CI/CD pipelines, Linux environments
