Profile

Business analyst with 6+ years bridging the gap between data and strategic decision-making across financial services, e-commerce, and operations. Experienced in requirements gathering, process mapping, and delivering insight-driven recommendations that directly influence product and business direction.

Experience

Sr. Business Analyst, Vantara Financial Services; Apr 2021 – Present

Leads requirements definition and solution design for a portfolio of digital banking products, working directly with product owners, engineers, and compliance teams to deliver initiatives on time. Identified a process inefficiency in the loan approval workflow that, once addressed, reduced average processing time by 3 days and saved an estimated \$600K annually.

Business Analyst, Broadfield E-Commerce Group; Jun 2018 – Mar 2021

Partnered with marketing and logistics teams to analyze customer journey data and surface friction points in the checkout experience, contributing to a 22% reduction in cart abandonment. Maintained and improved a suite of operational Power BI reports used across four regional offices to track fulfillment and returns performance. Facilitated workshops with business stakeholders to translate high-level objectives into detailed functional requirements for two major platform releases.

Jr. Business Analyst, Harcastle Consulting; Aug 2016 – May 2018

Supported senior analysts on client engagements spanning retail, healthcare, and logistics, contributing to process mapping, data gathering, and presentation of findings. Built Excel-based financial models used to evaluate cost-reduction scenarios for a mid-size manufacturing client. Assisted in the delivery of a business case that secured \$1.2M in internal investment for a supply chain modernization project.
