PROFILE

Data analyst with 5+ years turning complex datasets into clear business insights across retail, finance, and operations sectors. Proficient in end-to-end analysis workflows from data wrangling and modeling through to stakeholder-ready visualization and reporting.

EXPERIENCE

Data Analyst — Meridian Financial Group, Atlanta, GA; Feb 2021 – Present

Built and maintained an automated reporting pipeline that replaced 15 hours of manual weekly work, significantly improving team efficiency. Developed a customer segmentation model that identified 4 high-value cohorts, informing a targeted campaign that drove a 12% revenue uplift. Works closely with product and finance teams to define KPIs and build self-serve dashboards in Tableau used across the organization.

Junior Data Analyst — Crestline Retail Co., Athens, GA; Aug 2018 – Jan 2021

Analyzed sales and inventory data across 30+ store locations to identify stock optimization opportunities, contributing to a measurable reduction in overstock costs. Designed and maintained SQL views relied upon daily by the operations team for real-time decision making. Produced weekly executive summary reports from raw ERP data, consistently delivered to leadership ahead of schedule.

Research Assistant — Georgia Tech, Atlanta, GA; Jan 2017 – May 2018

Supported faculty research in the School of Computational Science and Engineering, assisting in the collection, cleaning, and analysis of large structured datasets. Wrote Python scripts to automate data preprocessing tasks, reducing preparation time for analysis by roughly 40%.

EDUCATION

B.S. Statistics, Georgia Institute of Technology, 2018

SKILLS

Python (pandas, NumPy, matplotlib, seaborn), SQL, R, Tableau, Power BI, Excel (advanced, pivot tables, VBA), Google BigQuery, Snowflake, dbt, Apache Spark, Git, Jupyter, Statistical Modeling, A/B Testing, Data Cleaning & Transformation, Dashboard Design, ETL Pipelines, Data Governance

CERTIFICATIONS

Google Data Analytics Professional Certificate (2021)
